A HOLISTIC APPROACH TO 21ST

CENTURY HEALTHCARE DESIGN

USERS

Research unequivocally demonstrates the significant effect of nature on health and wellbeing. Inclusive and integrated design processes can greatly assist in achieving demonstrated health outcomes. The value proposition of our approach provides an insight into the journey, complexities of designing healthcare facilities and a considered approach for 21st Century Healthcare design. The paybacks of an evidence based design approach are manifold and draw on academic research.

and practical design applications.

A bridge link for fresh air & opportunity t

A community park – full of cultural metaphon

A belvedere on top of the entrance pavilio

A guirky moat to welcome visitors and staff
